UNITED STATES ARMY

Hi everybody, we went to the P.X last night & I bought a few little things such as stationery. We just got out of testing this morning & we'll probably have to go somewhere else today. I wrote you a note in my civilian clothes but I don't know if you'll get this or my clothes first because I don't know when we mail the box.

About the biggest gripe I have so far is that they make you eat like a bunch of pigs. If your not cramming it down with both hands your to slow, or even if you chew it! Oh! if you talk while your eating you stand up and eat. They havent caught me yet

but they made one guy stand up. I guess they have to be that way since they have so many to feed. I've been on K.P. twice so far once I just served & the other time I had to clean their damn stove. I'm pretty sloppy because I'm in a hurry - they'll probably call us out anytime. They just pick you at random for K.P. I also had to be a fire guard for an hour the other night. Someone has to be up all night to make sure nobody smokes in bed & to make sure the doors remain locked. I've finally got enough change that I'll probably call tonight if I can get out of the barracks. Well I'll sign off for now.

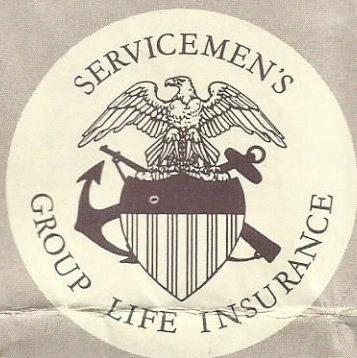

Love Terry

P.S. if you guys need any money just get it out of my savings - or if sister calls again.

P.S. I almost forgot I'm supposed to send the Lincolns & Jeffersons - Mom
